Projects

Unimart | Full Stack | Live_link | Github |
- Unimart is a web application which is used to exchange, buy or rent used products by college students. They can share it among junior Students who need it like Calculator, MIni Drafter or the things which are not used by the college seniors as they are going to graduate.
- Used HTML, Tailwind CSS, Vanilla CSS to create the user Interface and Django and python for the backend and database.

SportOn | ReactJS | Live_link | Github |
- SportOn is a web application which is used by the sports person where they can register themselves and connect, organize and play Together and form a team to participate in the different events.
- This application provides you the option to choose your domain of sports and find the same kind of sports person.
- I have used ReactJS as a main stack to create this platform and Vanilla CSS for the styling along with JavaScript and HTML. And for storing The user credentials I have used Firebase store and authentication.

Portfolio | ReactJS | Live_link | Github |
- Created self description web page.
- Used ReactJS and CSS along with EmailJS for the validations.

Invoice Generator | Full stack | Github |
- It is a Django web application which is used to create the invoice for any company or any service
- Used Django and Python to create this project along with HTML, Vanilla CSS and JavaScript.
